Institutional Identity and History

(From Official SSUET Website — ssuet.edu.pk/about-us and Wikipedia — Sir Syed University of Engineering and Technology)

Sir Syed University of Engineering and Technology, commonly known as SSUET, is a private research university located in Gulshan-e-Iqbal, Karachi, Sindh, Pakistan. The university is named in honor of the notable 19th-century Muslim reformer, educationist, and philosopher Sir Syed Ahmad Khan, whose Aligarh Movement formed the ideological foundation of the institution.

History: The university came into being on 8 October 1993, founded by Z.A. Nizami, who was also the former Director General of the Karachi Development Authority and President of the Aligarh Muslim University Old Boys Association, commonly known as AMUOBA. Its Charter formalities were completed by an Act passed by the Sindh Assembly on 17 September 1995, granting it the status of a degree-awarding institution. The university was established in the spirit of the Aligarh Movement — to advance modern scientific and technological education among the youth of Pakistan.

Motto: The official motto of the university is the Quranic verse meaning “He (Allah) has taught man that which he knew not.” The university colors are purple, gold, and olive green.

Recognition and Rankings: SSUET is fully recognized by the Higher Education Commission of Pakistan. It is ranked among the top universities in Pakistan in the engineering and technology category by the Higher Education Commission. The university is also a member of the Association of Commonwealth Universities of the United Kingdom and a member of the International Association of Universities.

Campus Infrastructure

(From Official SSUET Student Handbook — ssuet.edu.pk and Wikipedia)

Main Campus: The primary campus of SSUET is situated at the intersection of University Road and Sardar Ali Sabri Road, in the heart of Gulshan-e-Iqbal Block-5, Karachi. This campus houses all engineering, computing, sciences, and business faculties. All classrooms, laboratories, and administrative offices are air-conditioned and equipped to international standards.

Sir Syed Tower: A secondary facility located opposite the Supreme Court Registry, near Shaheen Complex, in the downtown area of Karachi. At Sir Syed Tower, short courses in Information Systems and Cyber Security are conducted. Additional educational programs are planned for this facility in the future given its strategically central location.

Future Campus — Education City: An area of 200 acres has been earmarked for SSUET in Karachi's Education City, situated along the link road connecting the Super Highway and National Highway. The university has already established a site office, developed water infrastructure, and carried out plantation and survey work at this future campus location. The campus development is currently ongoing.

Academic Programs

(From Official SSUET Admissions Page — ssuet.edu.pk/admissions and admissionscorner.com — Fall 2025 Admissions)

SSUET is organized into four main faculties: the Faculty of Electrical and Computer Engineering, the Faculty of Computing and Applied Sciences, the Faculty of Civil Engineering and Architecture, and the Faculty of Business Management and Social Sciences. All engineering programs hold Pakistan Engineering Council accreditation.

Bachelor of Science Engineering Programs

The following Bachelor of Science Engineering programs are offered at SSUET: Biomedical Engineering, Computer Engineering, Civil Engineering, Electronic Engineering, Electrical Engineering, and Telecommunication Engineering.

Bachelor of Science Technology Programs

The following Bachelor of Science Technology programs are offered: Bachelor of Science in Civil Engineering Technology, Bachelor of Science in Electronic Engineering Technology, and Bachelor of Science in Electrical Engineering Technology.

Bachelor of Architecture

The Bachelor of Architecture is a five-year undergraduate program offered at SSUET.

Bachelor of Science Computing and Applied Sciences Programs

The following Bachelor of Science programs are offered under the Faculty of Computing and Applied Sciences: Computer Science, Software Engineering, Information Technology, Cyber Security, Mobile Communication and Security, Bioinformatics, Mathematics, Biotechnology, Biomedical Sciences, Clinical Psychology, and Food Science and Technology.

Business Programs

The Bachelor of Business Administration is offered as a four-year program. A two-year Bachelor of Business Administration program is also available exclusively for students who already hold a 14-year undergraduate degree.

Postgraduate Programs — Master of Science

Master of Science programs are offered in Biomedical Engineering, Computer Engineering, Electrical Engineering, Electronic Engineering, Telecommunication Engineering, Computer Science, Software Engineering, Mathematics, and Civil Engineering. A Master of Business Administration program is also offered.

Postgraduate Programs — MPhil

MPhil admissions are open in the following disciplines: Biomedical Engineering, Computer Engineering, Civil Engineering, Electronic Engineering, Electrical Engineering, Telecommunication Engineering, Computer Science, Software Engineering, and Mathematics.

Doctoral Programs — PhD

PhD programs are currently offered in Biomedical Engineering, Electronic Engineering, and Mathematics.

Admission Policy (2025-2026)

(From Official SSUET Undergraduate Admissions Page — ssuet.edu.pk/admissions/undergraduate-admissions and ilmkidunya.com — SSUET Karachi Admissions 2025)

Merit Formula

Admission merit at SSUET is calculated based on a combination of the applicant's previous academic record, specifically the Higher Secondary Certificate result, and the performance in the SSUET Entry Test. The final merit list is generated after the entry test results are processed and candidates are ranked accordingly.

Eligibility Criteria

For undergraduate programs, students must have passed the Higher Secondary Certificate examination or an equivalent qualification with the required minimum percentage for their chosen program. Students who are currently registered for Higher Secondary Certificate Part Two or equivalent supplementary examinations in 2025 may also apply on a provisional basis, provided they submit a current Admit Card or Statement of Entry. Admission remains provisional until final results are submitted and eligibility is confirmed within the specified deadline.

Pre-Medical students are eligible to apply for Computing and Technology programs. However, they must successfully complete a Mathematics Foundation Course during their first year at the university as a mandatory deficiency requirement.

Students from equivalent boards, including those with Cambridge Ordinary Level and Advanced Level qualifications, must submit an Inter Board Committee of Chairmen equivalence certificate in order to proceed with their admission.

For postgraduate Master of Science programs, candidates must hold an appropriate undergraduate degree and must have passed the SSUET Graduate Assessment Test or a National Testing Service General Aptitude Test with a minimum of 50% marks prior to admission. A mandatory interview conducted by the Departmental Postgraduate Committee must also be cleared.

For PhD programs, candidates must hold a recognized Master of Science, Master of Philosophy, or equivalent degree with a minimum Cumulative Grade Point Average of 3.0 out of 4.0 or First Division in the annual system. The SSUET Graduate Assessment Test or Higher Education Commission Approved General Aptitude Test must be passed with a minimum of 60% marks. A statement of purpose and a departmental interview are also required.

Admission Categories

SSUET offers admissions under two categories. The Open Merit category is for students who qualify based on their academic record and entry test performance. The Self-Finance category is available for students who do not meet the open merit cutoff but still wish to secure a seat at the university at a higher fee.

Application Process

Students must apply online through the SSUET admissions portal available on the official university website. The application fee voucher must be paid at MCB Bank and uploaded to the portal. Payments made through the PAYPRO online option are verified automatically. Payments made close to the deadline take two to three working days to verify. Inter-bank Fund Transfer payments are not permitted. On-campus payment is available on the day of the entry test for students who missed the deadline.

Entry Test Details

(From Official SSUET Undergraduate Admissions Page — ssuet.edu.pk/admissions/undergraduate-admissions/admission-test-details and ilmkidunya.com)

The SSUET Entry Test is a mandatory component of the undergraduate admission process. The test is conducted on campus and students must carry their admit card, original National Identity Card or Bay Form, a paid test fee voucher, stationery, and a calculator. Mobile phones and smart watches are strictly prohibited during the examination.

Students have the flexibility to choose the type of entry test based on their subject background from intermediate or equivalent qualifications. The test is designed to assess aptitude across the relevant subjects of study.

Entry Test Exemption: SSUET allows exemption from its own entry test for students who have already appeared in and passed any of the following tests in 2025: the Undergraduate

Scholastic Assessment Test, the NED University Entry Test, the Mehran University of Engineering and Technology Entry Test, the National Testing Service test, the Educational Testing and Evaluation Agency test, the Medical and Dental College Admission Test, or any Public Sector University Entry Test. Students can claim exemption by uploading a valid scorecard with their application or by visiting the Admissions Office before the deadline. Exempted students may still optionally attempt the SSUET test to improve their score, in which case the highest score will be used in merit calculation.

Fee Structure (2025-2026)

(From SSUET Official Fee Structure Page — ssuet.edu.pk/charges, SSUET Revised Fee Components Notification — ssuet.edu.pk, and Scribd Document — Sir Syed University Fee Structure 2025)

SSUET charges fees on a per-credit-hour basis combined with a set of fixed semester charges. The one-time admission fee for all engineering programs is Rs. 35,000. The security deposit is Rs. 5,000, the enrollment fee is Rs. 3,000, and the medical fee is Rs. 1,500. Additional fixed semester charges include a Book Bank membership fee, a Student Activity fee of Rs. 1,050, a Network Charges fee of Rs. 1,000, a Laboratory fee of Rs. 1,000, and an Examination fee of Rs. 4,000. A Semester Fee of Rs. 11,000 is also charged each semester.

Tuition is charged at a per-credit-hour rate. For the Computer Science program as an illustrative example, the per-credit-hour rate results in a tuition component of approximately Rs. 69,700 for a standard 17-credit-hour semester load, bringing the total first semester fee to approximately Rs. 128,100 including all charges and the one-time admission fee.

A withholding tax of 5% is applicable in cases where the total fee paid during a financial year exceeds Rs. 200,000. Fee refunds for new admissions follow the rules of regulatory bodies.

Fee for International Students: A separate fee structure in United States Dollars is applicable for international students and covers the same program categories of

Biomedical Engineering, Civil Engineering, Electrical Engineering, and Mathematics among others. Students are advised to contact the admissions office for the current international fee schedule.

Semester Freezing: A student may freeze a semester within 15 days of the commencement of classes by paying the semester fee. Students who study beyond the standard four-year duration and wish to take nine or more credit hours after the fourth year must pay the semester fee in addition to the credit-hour fee.

Scholarships and Financial Assistance

(From SSUET Official Scholarship Notification and Criteria — ssuet.edu.pk/students and Studocu — SSUET Scholarship Criteria 2022)

SSUET offers internal scholarships and financial assistance to eligible students every semester. The scholarship grant covers 48% to 54% of the tuition fee and is awarded based on academic merit and financial need. The university scholarship program is designed to prevent financial difficulties from being a barrier to academic continuity.

Scholarship categories include merit-based awards for students who achieve the highest academic performance in their semester, brother and sister category awards for families with two or more students enrolled simultaneously at SSUET, and financial assistance for genuinely deserving students facing economic hardship.

Key conditions governing the scholarship program are as follows. Only students who are regular and enrolled in a full course load in the previous semester are eligible to apply. Students who have cleared any subject through supplementary or resit examinations are not eligible for scholarship for that semester. Students in their 8th semester, or their 10th semester in the case of Architecture students, are not eligible to apply. Sons and daughters of SSUET staff members are not eligible. Students who are already receiving a scholarship from any external source are not eligible for SSUET scholarships simultaneously. A freeship award means 100% of the tuition fee is waived. The decision of the Scholarship Committee is final and cannot be challenged. The Gold Medal awarded at convocation requires a minimum Cumulative Grade Point Average of 3.5.

External scholarships available to SSUET students include Higher Education Commission Need-Based Scholarships and international grants such as the Heydar Aliyev International Education Grant Program for Non-Aligned Movement member states.

Campus Facilities

(From SSUET Student Handbook — ssuet.edu.pk/wp-content/uploads/Student-Hand-Book.pdf and Wikipedia — Sir Syed University of Engineering and Technology)

Library: The SSUET library maintains a large collection organized across general, engineering, technology, Islamic studies, and reference sections. A donated books section is maintained separately. A Book Bank program allows students to rent textbooks at a subsidized cost for the entire semester.

Sports: The university has a sports ground located in front of the main gate, which includes a basketball court, volleyball ground, and cricket pitch for net practice. Indoor facilities include table tennis and badminton. Steps are in progress for developing hockey and football grounds.

Health Center: An on-campus health center and ambulance service are available for students and staff.

Mosque and Prayer Areas: A mosque is located within the campus. Dedicated prayer areas and girls' common rooms are also available for female students.

Student Facilitation Center: A centralized student facilitation center enables students to access administrative departments including Examinations, Finance, and the Scholarship Office from a single point.

Career Planning and Placement Bureau: This bureau is dedicated to establishing liaison between graduates and employers. Services include internship facilitation, employer visits, career counseling, industrial tours, job fairs, research collaboration, and workshop organization. The SSUET Job Fair is held annually, bringing together employers from technology, engineering, and business sectors.

Student Societies and Cultural Activities: The university hosts a Literary Arts and Cultural Forum. Annual musical and cultural events are held. Students are encouraged to form clubs and societies including drama societies, book reading clubs, and debate forums.

Quality Assurance: The Quality Enhancement Cell appoints a coordinator at each departmental level to bridge the gap between students and the cell. Teacher and course evaluation is compulsory for all students every semester.

IEEE Student Branch: The Institute of Electrical and Electronics Engineers student branch at SSUET comprises five sub-branches: the Computer Society, the Engineering in Medicine and Biology Society, the Power and Energy Society, the Robotics and Automation Society, and the Women in Engineering Society.

Refund Policy

(From SSUET Fee Structure Document — ssuet.edu.pk/charges and SSUET Student Handbook)

Fee refunds at SSUET follow the rules of the regulatory bodies and the Higher Education Commission of Pakistan. Students who wish to freeze a semester must do so within 15 days of the commencement of classes by submitting the required fee. The one-time admission fee is non-refundable. Specific refund timelines for tuition fee follow Higher Education Commission national guidelines, which provide for a full refund if withdrawal occurs within the first week of classes, a partial refund in the second week, and no refund thereafter.

Summary and Context

(From Official SSUET Website, Wikipedia, and uniRank — Sir Syed University 2025)

Sir Syed University of Engineering and Technology stands as one of the most established private engineering universities in Karachi and Pakistan. With over three decades of operation since its founding in 1993, the university has built a strong reputation for engineering and technology education grounded in the reformist values of the Aligarh Movement.

The university offers the highest number of engineering programs in the private sector in Karachi, with all programs carrying Pakistan Engineering Council Level Two accreditation. Its broad portfolio covering engineering, computing, biosciences, architecture, and business provides students with a wide range of professionally oriented pathways. The entry test exemption policy for students who have already cleared any recognized public sector university or national test significantly reduces the admission barrier, making the process more accessible and streamlined. With a scholarship program covering nearly half the tuition for high-performing students and a growing campus infrastructure including the planned Education City campus, SSUET continues to expand its capacity and academic reach within Karachi and Sindh.
